DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-51, drawn to an optical device or planar waveguide device, classified in class 385, subclass 16.
 - II. Claims 52-64, drawn to a method of making a planar waveguide device, classified in class 385, subclass 16.
 - III. Claims 65 and 66, drawn to a method of transmitting and modifying an optical signal in a planar waveguide device, classified in class 385, subclass 15.

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by a materially different process such as etching a microchannel into a substrate and then forming a waveguide in sufficient proximity to the core of the waveguide. It should also be noted that the methods do not include a core for the waveguide, therefore the methods cannot be used to form the optical devices as they are claimed.

Art Unit: 2874

3. Inventions I and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process as claimed can be used with another materially different product such as any switch or attenuator that utilizes light from a waveguide contacting a liquid.

4. Inventions II and III are related as process of making and process of using the product. The use as claimed can be practiced with a materially different product. Numerous methods could be used to produce a product to perform this process.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. A telephone call was made to Charles Holland on 11/13/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
